

ABOUT THE ORGANISERS

Shri Dharmasthala College of Engineering and Technology, Dharwad was established in the year 1979 under the flagship of SDME society and has grown in to one of the nationally acclaimed premier engineering institutions of the country. President of SDME Society Padmabhushana Dr. Veerendra Heggade, Dharmadhikari of Shri Kshetra Dharmasthala is the guiding spirit and driving force for all progress and achievement of all these institutions. SDMCET has been accredited twice by the National Board of Accreditation and owing to its academic excellence over the years it has also been conferred with Autonomous Status by Visvesvaraya Technological University (VTU), Belgaum & University Grants Commission, New Delhi. It is also one of the very few private engineering colleges in the country, selected for Technical Education Quality Improvement Programme (TEQIP) By World Bank.

The Board for IT Education Standards is a non-profit Society set up by the Karnataka Government, in association with IT industries and educational institutions, in order to enhance the quality of IT education and help build quality manpower for the IT industry. It strives to enhance IT education standards by disseminating information, offering educational support services for updating of IT skills. BITES takes initiative to organize and conduct competitions for the faculty members to recognize the achievers in areas identified from time to time

ABOUT WORKSHOP

Good governance is about the processes for making and implementing decisions. It's not

about making 'correct' decisions, but about the best possible process for making those decisions. As our digital age evolves and becomes even more complex and hurried, the value of learning and leadership development has become critically important to the success and growth of the organization. Leadership begins with new criteria, meaningful experiences, and smart, innovative development paths. Leaders that will succeed tomorrow are not created with systems built yesterday. To keep up with this change, and survive in a new uncertain, global environment, leadership and its development process must also adapt quickly.

SCOPE AND OBJECTIVES

This workshop will bring together experts in the field of technical education and share their experiences. It will provide insight into good governance planning and implementation of best practices in technical institutions. This will help these institutions to overcome their shortcoming and lead them on to the path of becoming world class institutions.
