

Report of Engineers day at EEE Department SDMCET Dharwad-

Solar energy is an emerging area for the engineers in the days to come and young engineering students should focus on the technical aspects of making solar affordable to common man opined Shri R. S. HIREMATH, retired Chief Engineer of Raichur Thermal Power Station. He was addressing the Electrical and Electronics engineering students at S D M College of Engineering and Technology, Dharwad on the Engineers Day celebration. Rain fall shortage in Karnataka reduced the electrical power generation drastically and hence the government has been forced to go for power cutting measures. Make in India is an opportunity for the independent power producers to encourage power generation by Indian made products thus enhance Indian technical work force. Ultra Mega thermal power plants installed in Karnataka can act as base generation power for Karnataka. Regular maintenance of the power plants, augmenting the existing capacity, encouraging of renewable resources may help to solve the energy crisis of the Karnataka state he added.

Prof K GOPINATH, president of the function recollected the moral values practiced by Sir M Vishwaraiyah and it's relevant in the present situation. He called the young engineers to inculcate the human values in their practicing carrier.

Miss POOJA KURDEKAR welcomed the gathering; Miss NISHA introduced the chief guest. Dr. G. D. Kamalapur, Dr. R. L. Chakrasali, Prof V R Sheelavant, Prof Shravan Nayak, Prof Sushma D, and Prof Nanadkumar were present. Event was conducted for FIFTH semester students
