# SDM College of Engineering and Technology, Dharwad Department of Chemical Engineering

List of Courses having focus on Employability/Entrepreneurship/Skill development during last five years

		Activities/Content with direct bearing on
Name of the Course	Course Code	Employability/ Entrepreneurship/ Skill development
	2018	Scheme for Year 2021-22
MEPIP	18UHUC500	Management, entrepreneurship and IPR
Petroleum and		
Petrochemicals	18UCHE508	Crude refining, hydrocarbon cracking etc.
Novel Separation		Newer separations in biochemical, petroleum, gas,
Techniques	18UCHE705	metallurgical
Sugar Technology	18UCHE803	Distillery and cogeneration
Solid waste		
Management	18UCHO806	Integrated solid waste management
	2018	Scheme for Year 2020-21
Energy Tech and		
Management	18UCHE507	Energy systems, supply and environmental concern
MEPIP	18UCHC600	Management, entrepreneurship and IPR
Petroleum and		
Petrochemicals	18UCHE606	Crude refining, hydrocarbon cracking etc.
Novel Separation		Newer separations in biochemical, petroleum, gas,
Techniques	18UCHE709	metallurgical
Solid waste		
Management	18UCHE803	Integrated solid waste management
Sugar Technology	18UCHE805	Distillery and cogeneration

# Syllabus of Courses having focus on Employability/Entrepreneurship/Skill development during last five years

18UHUC500 Management, Entrepreneurship and IPR

(4-0-0)4

Contact Hours: 52

## **Course Learning Objective (CLO):**

- **1.** To understand the importance, development and different functions of management.
- **2.** To provide basic concepts of entrepreneurship, intellectual property rights and legal issues.

## **Course Outcomes (COs):**

Descr	iption of	the	cour	se: A	t the	end o	of		Map	ping t	o PC	s (1-12	2)/ PS	Os (13	3-15)

## **Course Content:**

#### **Unit-I**

**Management:** Meaning, nature and characteristics of management. Levels of management, development of management thoughts, modern management approaches.

**Planning and Organizing**: Nature, importance, purpose and objectives of planning. Types of plans, decision making and hierarchy of plans. Types of organization, departmentation, committees, organization levels and span of control.

12 Hrs.

### **Unit-II**

**Staffing and Directing:** Nature, importance, selection and recruitment. Leader ship styles, motivation, communication and coordination.

**Controlling:** definition, steps in controlling, essentials of a sound control system and methods of establishing controlling.

11 Hrs.

#### Unit-III

**Entrepreneurship:** Evolution, meaning and characteristics of entrepreneur. Functions and types of entrepreneurs, role of entrepreneurship in economic development and barriers of entrepreneurship.

**Small Scale Industry:** Role of SSI in economic development, advantages SSI, steps to start a SSI. Impact of liberalization, privatization and globalization. Ancillary and tiny industries.

10 Hrs.

## **Unit-IV**

Institutional Support: Introduction, Institutions to assist SSI. Objectives and functions of SSIDC, SSIB, DICs, TCOs, ICICI, NSIC, SIDO, IDBI and SIDBI etc.

Preparation of Project Report: Project identification, selection, contents, feasibility studies and network analysis.

10 Hrs.

#### **Unit-V**

**Intellectual Property Rights:** meaning and forms of IPR, international conventions, world court. Copy right, patents, Industrial designs and trademarks. Procedure for registration, infringements and remedies. Offenses and penalties.

09 Hrs.

## **Reference Books:**

- 1) Thomas W. Zimmerer, "Essentials of Entrepreneurship", PHI, 2005.
- 2) Veerabhadrappa Havinal, "Management and Entrepreneurship", 1/e, ISBN (13): 978-81-224-2659-5, New Age International, 2009.
- 3) Peter Drucker, "The Practice of Management", ISBN-10: 0060878975 Harper Business Reissue edition, 2006
- 4) N.K. Acharya, "Text book on Intellectual Property Rights", 4/e, Asia Law House.

18UCHE508	Petroleum and Petrochemicals	(3-0-0) 3
		Contact Hours: 39

## **Course Learning Objective (CLO):**

1. Studying this subject, the students will learn about the extraction and production of oil and gas to meet energy needs, as well as refining of crude oil for a wide spectrum of useful products such as petrochemicals, Chemicals, Plastics.

## **Course Outcomes:**

	Description of the course outcome: At the end of the course student will be able									ng to	POs (	(1-12)/	PSO	s (13-	15)	
the end	d of the	e co	urse	stud	ent w	vill be	able	0	ubsta Level	ntial (3)		derate rel (2)		Slight evel (

Mapping Level	2.25	2.5	1.3	1.0	-	3.0	-	-	-	-	-	-	2.0	2.0	-	

### **Course Content:**

## Unit-I

**Indian Petroleum Industry:** prospects & future, major companies, world production, markets, offshore and onshore, oil well technology.

**Petroleum Crude Characterization**: Composition and classification, UOP K factor, TBP analysis, EFV Analysis, Average Boiling points, ASTM Curves, Thermal properties, Pour Point. **07 Hrs.** 

#### Unit-II

**Product Properties and Test Methods:** Characterization -Flash point, Fire point, Reid vapor pressure Analysis, Octane Numbers, Cetane Index, smoke point, Burning quality, Carbon Residue, Viscosity Index, Softening point, Penetration Index, Oxidation Stability, Volatility, Aniline point, Pour point. Various Petroleum products & Additives for Naphtha, Gasoline, Gas, ATF, LPG, Kerosene, Diesel, Lubricating oils, Bitumen.

09 Hrs.

#### **Unit-III**

**Crude Pretreatment**: Crude receiving, Storing, Pumping, dehydration, comparison, petroleum furnaces and comparison, Refining of petroleum – Atmospheric and vacuum distillation. **07 Hrs.** 

### **Unit-IV**

**Treatment Techniques**: Removal of sulphur compounds, storage and stability, product treatment using solvent, dewaxing, clay treatment and hydro refining. **Thermal Cracking:** Visbreaking, Coking, Catalytic cracking (FCC), Hydro cracking, Air blowing of bitumen. Catalytic reforming, Extraction of Aromatics.

08 Hrs.

### **Unit-V**

**Petrochemicals:** Definition, importance and growth potential of the field, raw materials for petrochemical industries, sources, economics and advantages. Production of petrochemicals like dimethyl terephathalate (DMT), ethylene glycol, synthetic glycerin, LAB, acrylonitrile, methyl methacrylate (MMA), phthalic anhydride, maleic anhydride, phenol acetone, formaldehyde, production of carbon black. **08 Hrs.** 

## **Reference Books:**

1) B.K. Bhaskar Rao, "Modern Petroleum Processes", 3/e, Oxford IBH publisher.

- 2) Ram Prasad, "Petroleum Refining Technology", Khanna Publishers, 2000.
- 3) W.L. Nelson, "Petroleum Refinery Engineering" 4/e, McGraw Hill, 1985.
- 4) B. K. Bhaskar Rao, "A text book on petrochemicals" 1/e, Khanna Publishers, New Delhi, 1987.

18UCHE705

## **Novel Separation Techniques**

(3-0-0) 3

**Contact Hours: 39** 

## **Course Learning Objectives (CLOs):**

- **1.** To provide an understanding of novel/newer separations using mass transfer and thermodynamic considerations.
- **2.** To provide an understanding of their applications at different levels in industry, viz. refineries, biochemical processing, pharmaceuticals, gaseous separations, metallurgical etc.

**Course Outcomes (COs):** 

Desci	iption	of tl	ne co	ourse	out	com	e: At	M	appiı	ng to	POs	(1,12)	/ PSC	)s (13	-15)

## **Course content:**

## **Unit-I**

**Introduction to separations:** Importance, principles and separation factors, economic significance etc.

**Adsorptive Separations:** Thermal swing adsorption, gradient chromatography, Ligand chromatography and unsteady state fixed bed adsorption etc. **08 Hrs.** 

## **Unit-II**

**Membrane Separation Processes:** Classification, structure and characteristics of membranes, membrane modules, concentration polarization and fouling of membranes, R.O., U.F, Pervaporation, and gaseous separations. **08Hrs.** 

### **Unit-III**

**Surfactant Based Separations:** Fundamentals of surfactants at surfaces and in solutions. Liquid membrane permeation, foam separations, micellar separations. **08 Hrs.** 

## **Unit-IV**

**Super Critical Fluid Extraction:** Physicochemical principles, thermodynamics, process description. Applications and case study. **08 Hrs.** 

### Unit-V

**Miscellaneous Separations**: Gaseous diffusion, Thermal diffusion, electrophoresis and types. **07 Hrs.** 

## **Reference Books:**

- 1) P.C. Wankat, "Large scale adsorption chromatography" CRC Press, 1986.
- 2) R.W. Rousseu, "Handbook of separation process technology", John Wiley and sons 1987.

#### Course content:

### Unit- I

**Over view of Sugar Industry:** Overall scenario of sugar industry both globally and in India. Factory site, layout of the factory. Sugar cane, sugar plantation, plant protection of sugar cane crop. Sugar cane cultivation, harvesting and milling process. Composition of cane and juice, properties of sucrose and reducing sugars. Various analytical methods used in sugar industry. **08 Hrs.** 

#### Unit- II

**Purification:** clarifying and bleaching agents, defecation process. Classification of sulphitation and carbonation methods. Advantages of carbonation over sulphitation. Methods for the clarification of the syrup. Filtration of scums. **08 Hrs.** 

#### Unit- III

**Unit Operations:** Evaporation, multiple effect evaporation, various features of evaporators design, causes of entrainment, incrustation formation and removal, crystallization, boiling syrup massecuites, requirements of good pan boiling, rate of crystallization, factors affecting the crystal growth, various types of crystallizers, boiling schemes, condensers, centrifugal operation, dryers, grading of sugar. **08 Hrs.** 

## **Unit-IV**

**Distillery:** Molasses, storage, utilization, various distillation types, advantages. Production of ethanol by fermentation process, factors influencing the production of alcohol, design considerations for distillation column, distillery wastes, treatment, disposal. **08Hrs.** 

## Unit- V

**Co-generation:** Types of co-generation systems, quality of bagasse and boilers used, efficiency, production of steam, quality of steam, pollution control measures for water, air, solid wastes and noise in sugar industries. **07 Hrs.**

## 18UCHO806 Solid Waste Management (3-0-0) 3

**Contact Hours: 39** 

## Course Learning Objectives (CLOs):

1. To provide students with a comprehensive understanding of integrated solid waste management from an environmental and public health perspective.

**2.** To study the detailed engineered system of solid waste management system.

## Course Outcomes (COs):

## **Course content:**

### Unit I

Introduction to Solid Wastes: Definition, Characteristics, Types of solid waste, Physical, Chemical and Biological properties of Municipal Solid Waste, Overview of materials flow in society and 4R concept of solid waste management. Evolution of SWM, Effect on health and environment. Legislation and government agencies.

08 Hrs.

### Unit II

**Engineered Systems for Solid Waste Management:** Generation of solid waste, Quantities of solid Waste, Methods to measure solid waste quantities, Solid waste generation and collection, Factors affecting solid waste generation rate,

Onsite handling, Storage and Processing, Transfer and transport, Collection system and devices. **08 Hrs.** 

## **Unit III**

**Processing Techniques and Recovery of Energy:** Objectives of waste processing, component separation and volume reduction, various processing technologies — biological and chemical conversion methods, Composting, Factors affecting composting, Aerobic composting and anaerobic Digestion, Details of energy recovery system, heat recovery, gasification, pyrolysis and refuse derived fuels (RDFs). Municipal incinerators, Grates, Furnances of solid waste. Recovery, Material and Energy recovery operations.

## **Unit IV**

**Disposal of Solid Wastes:** Various disposal methods, landfills — site selection, site infrastructure, essential components of landfill; types of landfilling methods, landfill planning —leachate management and gas control; Environmental monitoring systems for landfill sites, closure and post-closure plans for landfills, landfill site rehabilitation, reclamation and remediation. **08 Hrs.** 

## Unit V

**Hazardous Wastes:** Definition, identification and classification of hazardous solid waste, Origin and reduction at source, Collection and handling, Management issues and planning methods, Environmental Act, E-waste handling and disposal, Biomedical waste.

**Industrial Solid Waste Management:** Major industries and management methods used in typical industries – Coal fired power stations, textile industry, oil refinery, distillery, sugar industry, and radioactive waste generation units.

07 Hrs.

08 Hrs.

## **Reference Books:**

- 1) George Tchobanoglous, "Integrated Solid waste Management-Engineering Principles and Management issues", McGraw Hill, 1993.
- 2) Howard Peavy, "Environmental Engineering", McGraw Hill, 1986.
- 3) Dutta, "Industrial Solid waste Management and landfilling practice", Narose Publication, 1999.

**Contact Hours: 39** 

## **Course Learning Objectives (CLOs):**

- 1. Understand the utilization of conventional and non conventional energy sources and the principle of working of related equipments.
- 2. Recognize the effects of current energy systems on the environment and society.
- 3. Study energy costs/waste minimization without affecting production and quality.

## **Course Outcomes (COs):**

the end of the course student will be able to									Мар	ping t	o PC	s (1-1	2)/ P	SOs(13	3-15)	
the end	Identify and comprehend the effects of current energy system based on solid and gaseous fuels.  Analyze the principles are concepts and explain base principles involved in solar are wind energy conversion system.  Describe the challenges are problems associated with Bide energy and fuel cell technology and explain its basic principles are operations.  Summarize the basic principle are production process of ocean are tidal energy sources with regard to future energy supply are environmental concern.  Discuss the principles and need energy audit and management.							0		tantia el (3)		/lodera Level (		Slight Level (1)

Mapping Level	1.8	2.25	1.66	-	-	-	-	-	-	-	-	-	2.0	1.5	-	

## **Course Content:**

#### **Unit-I**

Introduction to Energy Sources: World energy futures, Indian energy scenario, Conventional and non-conventional energy sources. Fuels: Classification, properties and tests and analysis of solid, liquid and gaseous fuels.

08 Hrs.

## **Unit-II**

**Solar Energy:** Solar constant, Solar radiation at earth's surface, Solar radiation geometry, Solar radiation measurement. Solar water heating, space cooling, Solar distillation, pumping and Solar cooking- Basic principles, methods, applications, advantages and limitations. **Wind Energy:** Introduction, Basic components of WECS (wind energy conversion system). Classification of WEC Systems. Types of wind energy machines- (wind energy collectors) horizontal axis, vertical axis machines. **09 Hrs.** 

## Unit-III

**Bio-Energy:** Introduction, Biomass conversion technology, Wet and Dry process, Factors affecting Bio digestion or Generation of gases, Classification of Bio gas plants, Floating Drum, Fixed Dome plants -Basic principles, Construction and Working principles, Advantages and disadvantages. **Fuel Cells:** Design and Principle of operation, Classification, Types, Advantages and disadvantages, Conversion efficiency, Types of electrodes, Work output and EMF of Fuel Cells, Applications of Fuel Cells.

#### **Unit-IV**

**Geothermal and Ocean Energy:** Estimation and nature of geothermal energy, geothermal sources and resources like hydrothermal, geo-pressured hot dry rock, magma. Advantages, disadvantages and application of geothermal energy, prospects of geothermal energy in India. **Ocean Energy:** Principle of working, performance and limitations of Wave Tidal Energy. Ocean Thermal Energy-Availability, theory and working principle, performance and limitations. **07 Hrs.** 

### **Unit-V**

**Energy Management:** Principles and needs initiating and managing an energy management programs. **Energy Audit**: Elements and concepts, Types of Energy Audits, Energy Audit of any one chemical industries. **07 Hrs.** 

### **Reference Books:**

- 1) G.D. Rai, "Non-Conventional Energy Sources", 4/e Second Reprint, Khanna Publications", 1997.
